

ProBio TDS ERBIO-TDS

Cleans uric acid, limescale, oil and grease deposits in toilet systems, drains and pipes

Description

ProBio TDS is a powder product formulated to clean and disperse organic and inorganic substances, uric acid, limescale, oil and grease in toilet systems, drains and pipes.

Directions For Use/Applications & Dosage Rates General Cleaning

A 5% solution of ProBio TDS is made with water. For example, 5 units of ProBio TDS are mixed with 95 units of water to prepare the solution. The solution is then applied to the toilet system using a brush, spray, or cloth. Allow the solution to sit on the contaminated surface for 5-10 minutes before rinsing thoroughly with water. If needed, repeat the cleaning process.

Disinfectant Cleaning Chemical

Summary

- Due to its formulation, it provides fast and effective cleaning.
- Removes both organic and inorganic substances.
- Removes uric acid and descales toilet systems.
- Eliminates sewage system waste, oil and grease deposits.
- Thanks to its antibacterial properties, it removes foul odors in closed areas.
- Dissolves limescale in drain and pipes.

A) Organic Properties

Physical State (20°C) : Crystal
Color : White
Odor : Odorless

B) Physical Properties

pH : 0-2.0 (%1)
Molecular Weight : -
Explosion Limit : -
Density : 1.10-1.20 g/cm³
Solubility : Completely soluble in water.

Storage Conditions

Packaging Type : 25 kg sealed, original plastic buckets
Storage Period : 3 years

Approvals & Certificates

Product No : SP-KS-084
