

ProBio DPC ERBIO DPC

Unclogging sewer systems and piping circuits

Description

ProBio DPC; It is a powerful cleaner and care product developed to clean and unclog organic dirt clogging wash basins, showers and toilets, suitable for ship use. The product removes grease, organic oils, starch and components that cause clogging. ProBio BAC and ProBio DPC are used in similar areas but for different purposes.

Directions For Use/Applications & Dosage Rates General Cleaning

Mix 1 kg of ProBio DPC product with 9 liters of water and pour the solution you have prepared directly into the wash basins, all drains, sewers, especially the kitchen drain. 1-2 kg of products per week will be sufficient for the pipelines to remain in continuous operation, avoiding clogging.

Disinfectant Cleaning Chemicals
